

Quality Policy Statement

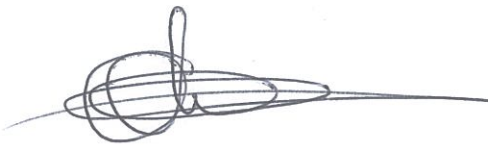

(Taken from Section 5.3 of the Planer Quality Manual)

As manufacturers and suppliers of equipment and consumables to the A.R.T. and Life Science Market, including Controlled Rate Freezers & Accessories, Bench top Incubators and Alarm & Monitoring Systems, Planer Limited are committed to the design, manufacture and supply of safe, effective and reliable products. Quality Objectives are continually set and reviewed in order to:

- meet or exceed customer requirements and expectations
- satisfy the requirements of the Quality Management System
- measure and improve operational performance
- comply with relevant regulatory and statutory requirements
- ensure continued suitability of the QMS.

This manual describes the activities employed by the organisation in order to satisfy the relevant regulatory requirements and indicates the lines of inter-relationship and responsibilities within the organisation. The policy also ensures all employees are fully aware of the requirements of the QMS and are appropriately trained to ensure its continued effectiveness.

In order to ensure that the organization demonstrates a commitment to comply with the requirements and to maintain an effective system, this policy and associated objectives are continually monitored and evaluated for suitability and effectiveness. This is achieved by means of internal auditing and management review in order to establish opportunities for improvement and to ensure their implementation and validation by the continual monitoring of performance.

Adrian Fuller
Managing Director, Planer Limited.
